## ES Series (14A) Single-phase Hybrid Inverter (LV)

The GoodWe ES Series is a bi-directional energy storage inverter with the ability to control the flow of energy intelligently. During the day, the PV array generates electricity which can be provided either to the loads, fed into the grid or charge the battery, depending on the economics and set-up. The electricity stored can be released when the loads require it during the night, including inductive loads such as air conditioners or refrigerators. Additionally, the power grid can also charge storage devices via the inverter. An all-round intelligent system for maximum energy flexibility.

Charge controller and inverter integrated

Maximum charge and discharge up to 100A

Export control (Zero export)

IP65 dustproof and waterproof

10ms UPS-level Switching

Fanless design, long lifespan

\*1: The actual charge and discharge current also depends on the battery.

\*2: 4600 for VDE 0126-1-1 & VDE-AR-N4105 & NRS 097-2-1.

\*3: Peak output apparent power can be reached only if PV and battery power is enough.

\*4: CAN communication is configured by default. If 485 communication is used, please replace the corresponding communication line.

\*5: FOR AUSTRALIA ONLY. Model GW3648D-ES inverters are designed without DC switch. For inverters designed with DC switch, the model name should be GW3648C-ES.

\*6: FOR AUSTRALIA ONLY. Model GW5048D-ES inverters are designed without DC switch. For inverters designed with DC switch, the model name should be GW5048C-ES.

\*: Under off-grid mode, then battery capacity should be more than 100Ah.

\*: When there is no battery connected, inverter starts feeding in only if string voltage is higher than 200V.
